Art Unit: 1618

Claims 1-3 are presented for examination.

The remarks filed on March 30, 2007 have been received and entered.

Crapo et al. has been withdrawn as a reference used in the obviousness rejection based on applicant's arguments.

Claims 1-3 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Malfroy-Camine et al. (U.S. Patent 6,046,188) in view of Winkler et al. (Molecular Vision 1999) for the reasons set forth on pages 2-4 of the office action of November 30, 2006.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant in his remarks argues that Malfroy-camine et al. do not teach the use of the claimed compounds for the treatment of macular degeneration, retinopathy and retinal edema. The arguments are not well taken. Applicant is reminded that the rejection is an obviousness rejection and not anticipation. Malfroy-Camine et al. is cited to show that claimed compounds as anti-oxidants having superoxide dismutase activity. Applicant also refers to Winkler et al. reference and argues that such reference does not teach that compounds with SOD activity can prevent oxidative damage associated with macular degeneration. Applicant argues that Winkler et al. teach superoxide dismutase and catalase as "the armory of protectants" involved in a reaction which may be involved in the development of oxidative damage which may lead to AMD. The arguments are not well taken. Applicant is reminded that obviousness does not require absolute predictability. Winkler et al. teach the role of oxidation in relation to macular degeneration and suggests that superoxide dismutase may be involved in preventing oxidative damage. Malfroy-

Camine et al. teach that the claimed compounds have superoxide dismutase activity. Therefore, it would have been obvious to use compounds having superoxide dismutase activity for the treatment of AMD motivated by the teaching of Winkler et al., which teaches the effect of superoxide dismutase in preventing oxidative damage.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
